Privacy Policy for MAPlayer

Developed by: The Legends Lab company | Version: v1.8.8 Stable | Last Updated: October 2026

MAPlayer values your privacy above all else. This application is built from the ground up to guarantee a **100% offline and localized user experience**. Your data, your privacy, and your security are safeguarded under ironclad rules enforced by our parent company, The Legends Lab.

1. 100% OFFLINE & LOCAL STORAGE

MAPlayer operates strictly on-device. All video files, audio tracks, rendering operations, and subtitle processing execute locally within your device's sandbox hardware environment. No media cache or dynamic content is processed outside your active local storage boundary.

2. NO TELEMETRY OR TRACKING

We believe your media consumption habits are strictly your own private business:

- **ZERO Telemetry:** We do not log, capture, audit, or report how you use the application, what interface features you tap, or what timeline sequences you process.
- **ZERO Tracking:** No unique device identifiers, tracking SDKs, analytics endpoints, or behavioral tracking cookies are embedded within this code architecture.
- **ZERO Cloud Uploads:** Your media files, playlists, and associated metadata never leave your physical device under any operations.

3. DEVICE PERMISSIONS & CORE USE

The application may explicitly require standard system storage permissions (such as Access to Media Files / Photos / Videos / External Volume) solely to locate, open, index, and play your local videos and external subtitle packages. This data is purely read-only for local rendering and is never transmitted externally or exposed to third parties.

4. COPYRIGHT, INTELLECTUAL PROPERTY & STRICT ENFORCEMENT

MAPlayer, including its official logo, custom user interface (UI) layouts, graphics, branding assets, custom component arrangements, and compiled source code, is the exclusive proprietary intellectual property of The Legends Lab company.

Any unauthorized duplication, decompilation, code extraction, application cloning, modifications, reverse-engineering, redistribution, or illegal publishing of this application's core architecture or visual layout elements on the Google Play Store, Apple App Store, GitHub, or any third-party website or marketplace is strictly prohibited.

The Legends Lab company strictly monitors application clones and retains full legal rights to initiate immediate digital enforcement, including filing formal Digital Millennium Copyright Act (DMCA) take-down dynamic requests and pursuing appropriate financial and legal statutory actions against infringing parties.

5. TOTAL LIMITATION OF LIABILITY & HACK/LEAK DISCLAIMER

While MAPlayer operates strictly as an offline standalone software service, The Legends Lab company implements industry-standard protocols to safeguard any associated development architectures. However, no data system or storage environment can be certified as 100% impenetrable.

In the event of any server hacking, external database breaches, unauthorized digital intrusions, or accidental data leaks affecting any affiliated platform, The Legends Lab company, its founders, active developers, and corporate affiliates shall not be held liable under any circumstances for any direct, indirect, incidental, consequential, special, punitive, or financial damages, losses, or legal costs arising from such unexpected security incidents.

Furthermore, MAPlayer is distributed on an "AS IS" and "AS AVAILABLE" technical basis. The company does not guarantee a bug-free execution and shall not assume responsibility for system failures, background crashes, software errors, or local media file corruption. By running this application, you acknowledge these risks and confirm that you utilize this platform entirely at your own absolute discretion and liability.

6. CHANGES TO THIS DISCLOSURE

Any systematic updates or architectural patches pushed to MAPlayer will strictly preserve this "Privacy-First" local deployment policy. If background feature specifications undergo modification, this documentation will be updated transparently to maintain alignment.

7. OFFICIAL LEGAL CONTACT
